

# MARGARET RIVER WINE

**MEDIA RELEASE**

**23 March 2020**

## **Seasonal Work in the Margaret River Wine Region**

We understand a very large number of workers in the Margaret River and surrounding areas are currently suffering from the unprecedented effects of the of COVID-19 and looking for alternative employment opportunities.

The 2020 harvest has finished for a number of wineries in the Margaret River Wine Region, with the last expected to be complete by mid-April 2020.

The Margaret River Wine Association has been in contact with our local labour hire members. We have been advised that they have the necessary staff to complete the 2020 harvest but will be requiring staff for the winter pruning season which normally commences at the end of May. It is understood that over 450 people are employed for the pruning season in the Margaret River Wine Region.

To register your contact details for employment opportunities from May 2020, please contact the local labour hire companies electronically.
